Dear Hiring Manager,

I graduated bachelor's degree in electrical – electronics engineering from Osmangazi University recently. After reviewing your job description I believe I will certain fit this position.

During my university education, I chose all programming lessons which I can take as technical elective. Due to pandemic, I had plenty time home and I used my free time to learn new programming languages and web designing I increased my algorithmic thinking skill as much as possible. Attempting robotic competition and making robotics projects made my coding knowledge and my algorithmic thinking ahead of .

I am a fast learner. I'm good at both teamwork and working alone. Thanks to the principle and knowledge I obtained in my education, I'm able to troubleshoot any problem I encounter during a project easily. I like to challenge myself and I always open to new duties. I would be honored to start my career in your company.

More details about my projects and me in my resume. I would be appreciated if you review. Thank you for your time.

Sincerely,

Göktuğ Kaan Can
